05 | SAFE TO DECIDE

Change direction. Preserve trust.

Five steps to a respectful reversal

01	**Recognize** Name the decision and the facts available at the time.
02	**Explain** State the new information, risk, or decision boundary that requires a change.
03	**Own** Take responsibility for the change in direction and for explaining it clearly.
04	**Direct** Give the next step, when it takes effect, and the support available.
05	**Clarify** Explain whether this changes one situation or a wider rule.

> **Change the decision, not the person's standing**
> Explain what changed and what happens next. Do not blame someone for following the direction they were given.

Receiving a reversal?

Ask what changes, why, when, and for whom. Confirm your next step, the support available, and which responsibilities remain yours.

Training basis: Safe to Decide, final Supervisor edition, slides 23–25. Five-step sequence retained.
