03 | EISENHOWER CHART | FLYER

The Eisenhower Chart

Sort tasks by urgency and importance to decide what to do next

	URGENT	NOT URGENT
IMPORTANT	**Q1 • ACT NOW** There is a real deadline or risk to services. Act now, using the correct approval process.	**Q2 • SCHEDULE** Set aside time for planning, prevention, training, and required work before it becomes urgent.
NOT IMPORTANT	**Q3 • CHECK & ROUTE** Confirm the request is real. Then route it, delegate it, or ask for more time, if you have the authority.	**Q4 • REDUCE OR STOP** If the work is not required and serves no purpose, cut it back or stop it.

> **Make time for Q2 work**
> Pick one Q2 task. Put it on your calendar and decide what "done" looks like.

Two questions to ask

Is it urgent? What happens if this waits?

Is it important? Does it support required duties, services, safety, or agreed goals?

Your job duties, your branch RACI, and your supervisor's direction help define what is important. Required work is still important, even when it is routine.
